## Dialogue on New Energy Storage

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism, segments and targets. Investor participation is beneficial for the development of the energy storage industry.

How many electrochemical storage stations are there in 2022?

In 2022, 194 electrochemical storage stations were put into operation, with a total stored energy of 7.9GWh. These accounted for 60.2% of the total energy stored by stations in operation, a year-on-year increase of 176% (Figure 4).

KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower ...

Speakers at the China-EU Solar & Energy Storage Industries Dialogue 2025 highlighted the growing interdependence between Chinese manufacturing scale and European ...

In this edition of the Energy-Storage.news US news roundup, EticaAG partners with Shell on battery immersion tech, Pacific Northwest National Laboratory begins utility-scale ...

On the afternoon of November 5, the Parallel Forum on "Promoting High-Quality Development of New Energy Storage to Accelerate the Global Energy Transition", jointly ...

In this edition of the Energy-Storage.news US news roundup, EticaAG partners with Shell on battery immersion tech, Pacific Northwest ...

As the global landscape of the energy transition and climate governance continues to evolve, 2025 is a crucial year for aligning innovation, policy and international cooperation. ...

At present, the global energy mix is undergoing profound transformation. As a key enabling technology, new energy storage has become a vital driving force for advancing the ...

Connecting China and Europe's solar & storage industries through data, dialogue, and

---

partnership to drive the global energy transition.

The Parallel Session on "High-quality Development of New Types of Energy Storage Accelerates Global Energy Transition" cordially invites your attention and participation.

The Coverage and Intensity of Policies Continuing to Increase Technological breakthrough and industrial application of new type storage are included in the 2023 energy ...

As China achieves scaled development in the green energy sector, "new energy" remains a key topic at 2025 Two Sessions, China's ...

As China achieves scaled development in the green energy sector, "new energy" remains a key topic at 2025 Two Sessions, China's most important annual event outlining ...
