## Hanoi Solar Containerized Fixed-Type Cooperation

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock)

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Is Vietnam ready for a competitive bidding mechanism for solar energy?

Vietnam is now developing a competitive bidding mechanism for solar energy to improve grid efficiency, promote competition, and ensure a stable energy supply, but it's currently in the works and hasn't been implemented yet. As such, Vietnam has been in a transition phase since the end of the FIT policy.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

Could Vietnam replace fixed feed-in tariffs with standardized auctions?

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

Vietnam's Ministry of Industry and Trade (MOIT) has announced new feed-in tariffs (FiTs) for utility-scale solar power plants, tailored to different regions and project types. The ...

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

While Northern Vietnam benefits from higher feed-in tariffs (FiTs) due to lower solar radiation, the overall system still operates on ...

Overview of the workshop. On November 28, the Hanoi Union of Science and Technology Associations and D& I Energy Vietnam held a scientific workshop titled "Solutions ...

A few years ago, Vietnam pledged to reach net-zero emissions by 2050 during the COP26 summit in Glasgow. This commitment reflects the country's determination to address ...

Investors and financial institutions related to 173 wind and solar power projects in Vietnam have called on the government to maintain the feed-in tariffs (FIT) and commercial ...

Energy storage included in Vietnam's latest solar policy shift Under the revised tariff framework, solar installations are categorized into ...

---

Investors and financial institutions related to 173 wind and solar power projects in Vietnam have called on the government to ...

A few years ago, Vietnam pledged to reach net-zero emissions by 2050 during the COP26 summit in Glasgow. This commitment reflects ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean ...

While Northern Vietnam benefits from higher feed-in tariffs (FiTs) due to lower solar radiation, the overall system still operates on capped tariffs rather than market-based auctions. ...

Vietnam's Ministry of Industry and Trade has proposed a subsidy of \$1.65 billion to support 14 million households in installing rooftop solar systems.

Under the updated tariff structure, solar projects are now divided into ground-mounted and floating categories, and segmented further by region--North, Central, and South ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized ...

Energy storage included in Vietnam's latest solar policy shift Under the revised tariff framework, solar installations are categorized into ground-mounted and floating types, ...
