
How many hydrogen energy stations are there in Kingston

How many hydrogen refueling stations are there?

By the end of 2023, there were 1,063 hydrogen refueling stations (HRS) in operation in 35 countries worldwide. The number of stations globally is forecast to increase to 6,080 by 2030, fueled by favorable government policies and rising demand for hydrogen-powered vehicles. The HRS supply chain comprises numerous regional and global operators.

How many hydrogen stations are there in the world?

However, the global distribution of hydrogen stations remains highly concentrated. Only 10 countries had 10 or more HRSs, accounting for 92% of the global total. China, South Korea, Japan and Germany have more than 100 operating stations, together accounting for 72% of the global total.

How many hydrogen fueling stations are there in 2024?

According to statistics, global HRS deployments, under construction and planning, reached 1,680 units during the first half of 2024 ("planning" stations refers to those that are announced with locations or investors). Among the 1,680 units - there are 1,148 hydrogen fueling stations that have commenced operation.

Where can I find information on hydrogen refuelling stations?

LBST has operated the database h2stations.org since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

LBST has operated the database [h2stations](https://h2stations.org) since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and ...

New Zealand has a small but growing hydrogen refuelling infrastructure: there are eight hydrogen refuelling stations, with three ...

What are battery storage power stations? Battery storage power stations are usually composed of batteries, power conversion systems (inverters), control systems and monitoring equipment. ...

Hiringa Energy & Waitomo Group - Hydrogen Refuelling Stations Construction of the first of four high-capacity refuelling stations started in ...

The Hydrogen Production Projects Database covers all projects commissioned worldwide since 2000 to produce hydrogen for energy or climate change-mitigation purposes.

The number of hydrogen refueling stations is increasing. According to this latest insight by Shirly Zhu, Principal Analyst at Interact ...

The number of hydrogen refueling stations is increasing. According to this latest insight by

Shirly Zhu, Principal Analyst at Interact Analysis, global HRS deployments reached ...

Existing and planned hydrogen fueling stations in the U.S. are available to view on a map or download as a spreadsheet from the ...

While hydrogen vehicles have been touted as the future of transportation for decades, the reality of fueling them in the United States ...

According to statistics, global HRS deployments, under construction and planning, reached 1,680 units during the first half of 2024 ("planning" stations refers to those that are announced with ...

The sparse network of refuelling stations is one of the reasons why hydrogen for cars is not catching on. This is made abundantly clear by a new report.

The first hydrogen refuelling stations in Bulgaria and Slovakia have been opened in their capitals. While many projects in Europe are ...

Operating Hydrogen Stations in the UK Currently, there are 16 operational hydrogen fuel stations in the UK, with more projects in ...

Number of hydrogen fueling stations for road vehicles worldwide as of 2025, by country [Graph], Hydrogen Tools, & US ...

Global hydrogen refuelling stations surpassed 1,000 in 2024, with 1,160 now in operation across 45 countries.

Number of hydrogen fueling stations for road vehicles worldwide as of 2025, by country [Graph], Hydrogen Tools, & US Department of Energy, August 12, 2025. [Online].
