Are NiMH batteries rechargeable?

The fact that some NiMH batteries are rechargeable also means you will not need to consume as many new batteries. A rechargeable battery can often be used hundreds of times if the charging is done correctly, which means a lot of batteries diverted from local landfills.

How many times can a NiMH battery be recharged?

High safety standards and good cycle stability The batteries naturally meet the currently the highest standards of safety and durability. Thanks to the excellent cycle stability, the NiMH cells can be recharged up to 2100 times. Since the batteries are supplied pre-charged, they can be used directly.

What is the capacity of the NiMH battery pack?

This is a rechargeable 2200 mAh NiMH battery pack. It has a voltage of 6.0 V and consists of five AA cells in a single row, terminated by a 'JR'-style connector. Alternatives are available with variations in these parameters.

Does a NiMH battery self-discharge?

The self-discharge is 10 times lower than in regular NiMH batteries. After a year, there is still around 85% of the initial capacity left. This was made possible by a special separator which dramatically reduces unwanted internal current flow.
