## Outdoor mobile power portable generator

What is a portable generator?

These generators, sometimes called backup generators, are used to provide temporary power when and where it is needed. Portable is a relative term; some are more portable than others. While the smallest models can be picked up and carried, most have wheels and a handle to make transport easier.

Do you need a portable generator?

The most common use and need for portable generators is for backup power. With the number of natural disasters trending up every year, according to the National Centers for Environmental Information, preparing for an outage is a more prudent investment than ever.

Can a DJI portable generator be used as a solar generator?

DJI portable generators are built to be mobile, last, and produce power. Whether it is powering your mini-fridge, charging your drone or running tools, wherever you are. Using DJI's solar panels, you can turn your portable power station into a solar generator.

What is a standby generator?

Standby generators are permanently installed and connected to a home. These may power selected, critical circuits during a power outage, or may provide power for the whole home. Standby generators have systems that monitor power supplied by a utility and start automatically in the event of an outage.
