
Syrian Island Power Ground Base Station

Is Syria's energy system in ruins?

Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges. The first, vital for Syria's swift recovery and political stability, is bringing reliable flows of electricity and fuel to its people.

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Turkey have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Turkey is also connecting its grid to Syria.

Why does Syria have a low electricity supply?

The war has seen a drop in electricity generation capacity from 8 500 Megawatts to just 3 500, primarily due to the destruction of key power plants including Mahardah, Aleppo and Zayzoun. The lack of reliable energy supplies is a major concern for Syrian citizens and its new government. Syria's oil and gas sector is in an even worse state.

Should the EU support energy generation in Syria?

In the short to medium term, it should support energy generation in Syria, especially in renewable electricity. In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity.
