
Uninterruptible power supply for operating room

What is an uninterruptible power supply (UPS) system?

Hospitals and other healthcare buildings are full of life-saving devices like ventilators and diagnostic tools, so power disruptions can have serious consequences. Fortunately, uninterruptible power supply (UPS) systems offer a solution. These systems provide a reliable backup to maintain continuous power and bridge the gap during outages.

What is a medical-grade uninterruptible power supply (UPS) system?

Our medical-grade uninterruptible power supply (UPS) system secures seamless backup power and protects your equipment from damage. These solutions will instantly switch your system to a backup power supply with no lapses, preventing dire consequences during medical procedures.

Why should you use uninterruptible power supply equipment?

Our uninterruptible power supply equipment efficiently does both to ensure you can carry on with your tasks without delay. These systems recover sufficient power for medical devices and imaging equipment for successful results.

What should a medical UPS system do if power fails?

In the event of a power failure, medical UPS systems must seamlessly switch to backup power sources, such as generators or battery systems. The transition should occur without any disruption to the power supply, ensuring the safe operation of essential medical equipment. 3. Advanced Isolation and Monitoring
